

It shows all the house design which is remodeled over this years. As this Visualization show that Remodeling trends vary over time for each design like in 1950 1.5Fin is most remodeled while in 2010 the most remodeled house design is 1 Story. So based on this data we have to focus on **remodeling 1 Story and 2 Story house design** more to that sales will be increased.

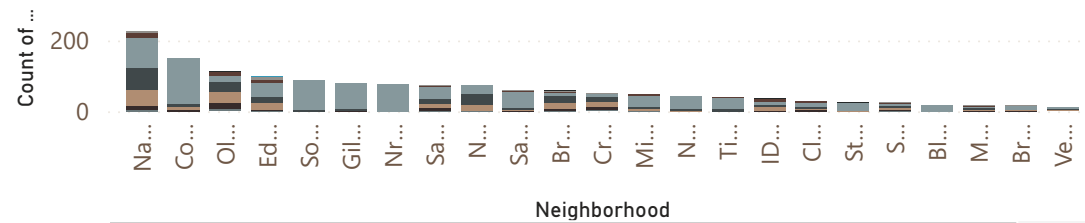

Total Sales
264M

The Sales is here identified by house design. It shows that Average sale price of house sold. So here mostly sold house design over house type is 2 Story and 1 story. So in all house type we most focus on house design **of 1 Story and 2 Story**.

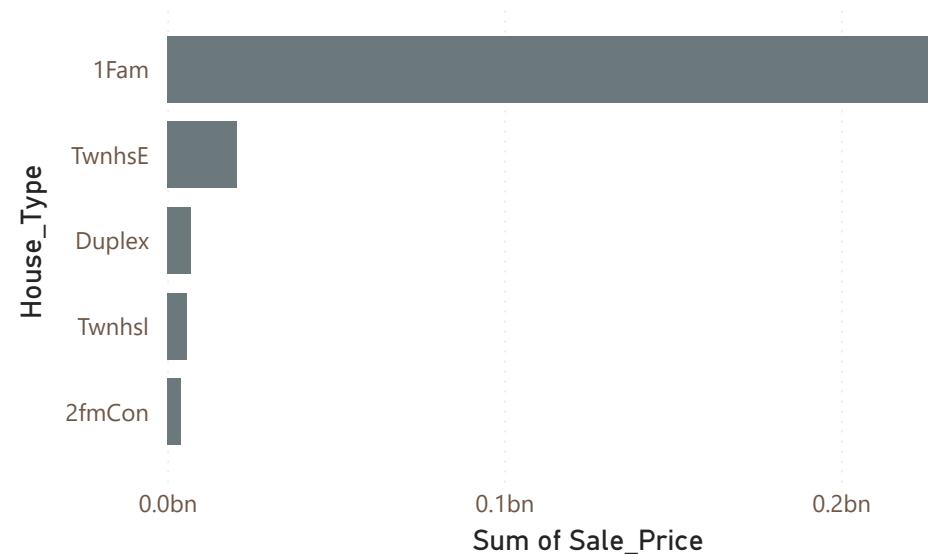

Total house condition by Neighborhood

House_Condition 9 8 7 6 5 4 3 2 1

Of all the months in **July** mostly house were sold. So in July month we grant buyers some discount and schemes to increase the sales.

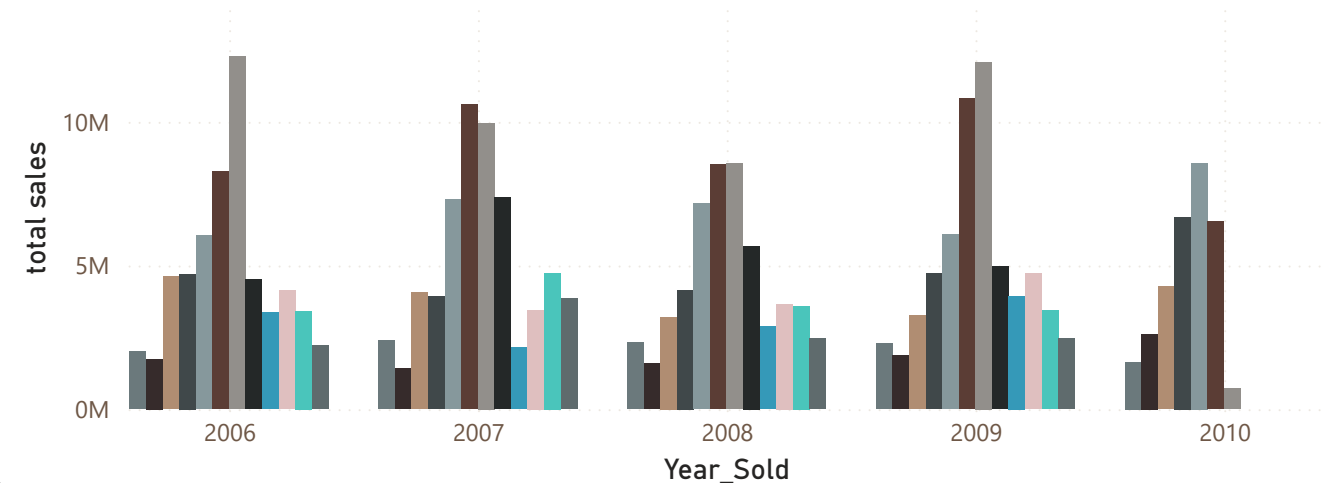

Total of house type

All household area has mostly in **Average condition**. So we have to increase the condition above Average to Very Excellent.

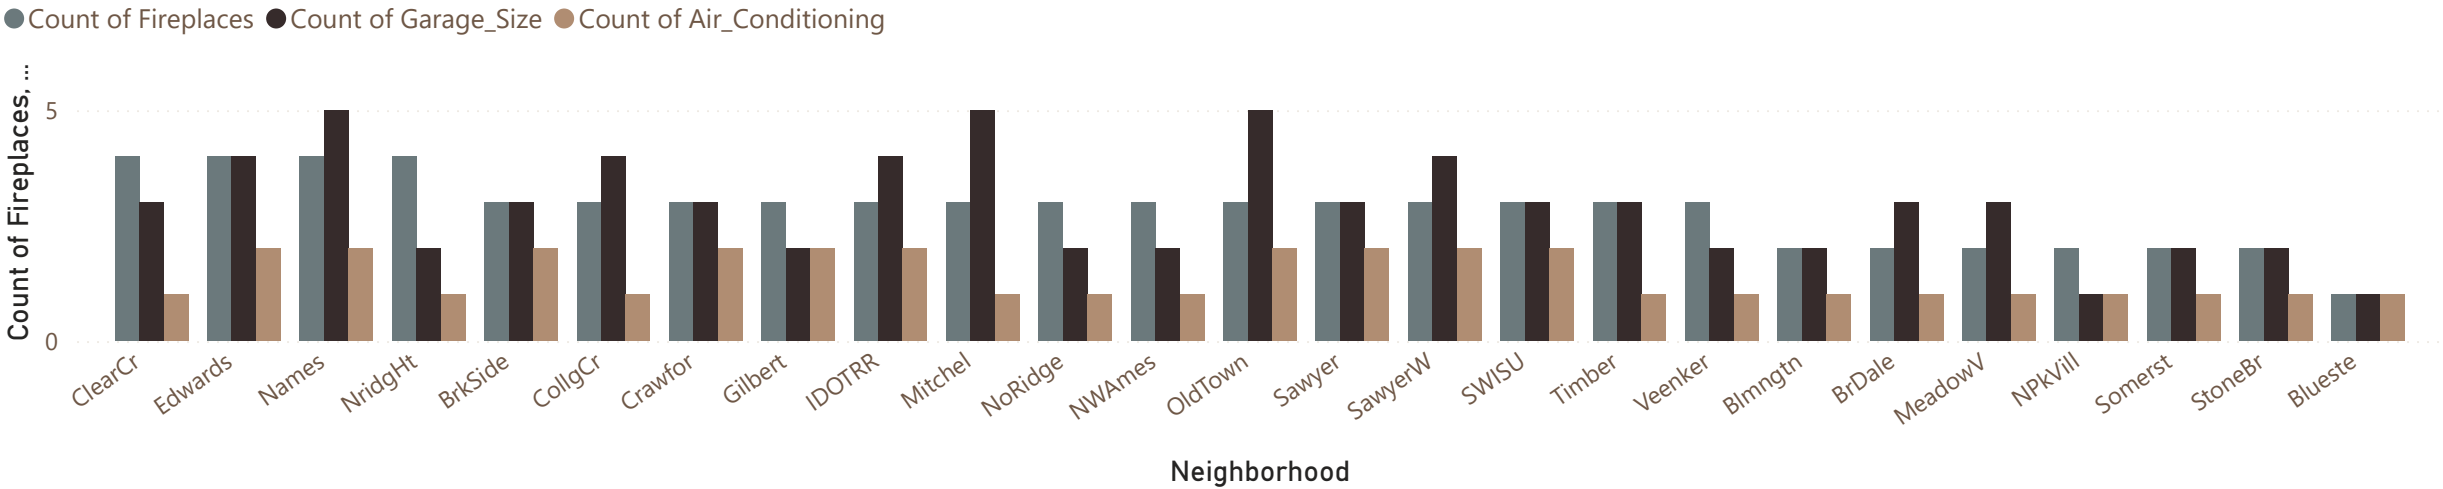

Total sales by year

Month_Sold 1 2 3 4 5 6 7 8 9 10 11 12

Above all house type the most **sold house type is 1 Fam(single family detached)** so we have to increase made house type like 1 Fam as it is on demand.

Total appllince by Neighborhood

As **Names** is the most popular neighborhoods for house sales, we are **enhancing the house appliances like AC** to make the homes more convenient for buyers. Also now in other neighborhood also we have to add more air conditioner for buyer's convenience.

Sum of Sale_Price by Neighborhood
